

COMMISSIE KOLONIALE COLLECTIES

ADVIES

Object	Gouden kastane (sabel)
Huidige eigenaar	Nederlandse Staat
Beheerder	Rijksmuseum Amsterdam
Teruggaveverzoek van	Republiek Sri Lanka
Datum teruggaveverzoek	4 maart 2021, gespecificeerd op 18 november 2022
Adviesnr.	SL-2023-3
Datum advies	12 mei 2023
Samenstelling Commissie i.c.	Mr. L.Y. Gonçalves-Ho Kang You (voorzitter), prof. dr. L.N.K. van Broekhoven, prof. dr. R. Raben (leden)
Secretaris	Mr. J.A. van Ooijen MA

1. Het object

De kastane is een ceremoniële sabel vervaardigd van ijzer en goud ingelegd met edelstenen, waaronder diamanten en robijnen. Deze kastane is rijk gedecoreerd met een massief gouden heft geornamenteerd met vier leeuwenkoppen (simhas) en twee godheden (Saraswati en Sri Lakshmi). De kastane heeft een houten, met goud beslagen schede. De vorm en decoratie zijn typerend voor kastane uit het koninkrijk Kandy in de achttiende eeuw. De kastane is in de collectie van het Rijksmuseum geregistreerd onder inventarisnummer NG-NM-560.

2. Het beleidskader

De beoordeling in dit advies vindt plaats binnen de kaders van de *Beleidsvisie collecties uit een koloniale context* van de Minister van Onderwijs, Cultuur en Wetenschap.¹ De beleidsvisie is gebaseerd op het rapport *Koloniale collecties en erkenning van onrecht* van de Raad voor Cultuur.² Een verzoek om teruggave kan worden ingediend door een Staat waar Nederland langere tijd koloniaal gezag uitoefende.

In de Beleidsvisie zijn de kaders van de beoordeling samengevat als volgt omschreven:

De Commissie stelt eerst vast of het herkomstonderzoek toereikend is.

Vervolgens stelt de Commissie vast of er sprake is van onvrijwillig bezitsverlies. Daartoe wordt beoordeeld of met een redelijke mate van zekerheid kan worden vastgesteld dat het verzochte cultuurgoed onvrijwillig is verloren in een land waar Nederland langere tijd koloniaal gezag uitoefende. Als wordt vastgesteld dat dat het geval is, zal worden geadviseerd tot een onvoorwaardelijke teruggave van het cultuurgoed.

Indien uit de herkomstgeschiedenis niet kan worden vastgesteld of sprake is van onvrijwillig

¹ Beleidsvisie 29 januari 2021, <https://www.rijksoverheid.nl/documenten/kamerstukken/2021/01/29/rapport-beleidsvisie-collecties-uit-een-koloniale-context>

² Rapport 7 oktober 2020, <https://www.raadvoorcultuur.nl/documenten/adviezen/2020/10/07/advies-koloniale-collecties-en-erkenning-van-onrecht>

bezitsverlies, en voor zover deze cultuurgoederen voor het land van herkomst een bijzonder cultureel, historisch of religieus belang vertegenwoordigen, maakt de Commissie een belangenafweging. Het belang van teruggave voor het herkomstland dient dan naar redelijkheid en billijkheid te worden afgewogen tegen andere relevante belangen.

Relevante belangen kunnen zijn het culturele belang van het cultuurgoed voor het herkomstland, de betrokken gemeenschappen in de herkomstlanden en in Nederland, het belang voor de collectie Nederland, de toekomstige bewaaromstandigheden en de publieke toegankelijkheid. Objecten kunnen veelzeggend zijn voor nationale en regionale tradities en de identiteit van een land, volk, gemeenschap of individu. Het belang van een koloniaal cultuurgoed zal vaak voor Nederland anders zijn dan voor het land van herkomst. Ook voor Nederlanders met wortels in de herkomstlanden kunnen koloniale cultuurgoederen in Nederlandse musea van speciale betekenis zijn.

Indien het teruggevraagde object afkomstig is uit een voormalige kolonie van een andere mogendheid maakt de Commissie eveneens een afweging. Het belang van teruggave voor het herkomstland dient naar redelijkheid en billijkheid te worden afgewogen tegen andere relevante belangen. Wel zal herstel van onrecht in de beoordeling het uitgangspunt moeten zijn. In dit geval is het onrecht niet door Nederland veroorzaakt, maar is Nederland als huidige eigenaar van de objecten wel de enige om dit onrecht te herstellen.

Indien de Commissie adviseert tot teruggave aan de verzoekende staat, dient ingevolge de Erfgoedwet en de *Beleidsvisie collecties uit een koloniale context* van de Staatssecretaris van Cultuur en Media rekening gehouden te worden met de vervreemdingsprocedure voor publieke collecties en wordt het advies van de Commissie tevens beschouwd als een advies over de onmisbaarheid en onvervangbaarheid van het object in de zin van artikel 4.18 van de Erfgoedwet.

3. De procedure

Op 18 november 2022 heeft de Republiek Sri Lanka een verzoek ingediend bij de Staatssecretaris voor Cultuur en Media om teruggave van de gouden kastane die is buitgemaakt tijdens de aanval op Kandy in 1765. De Staatssecretaris heeft de Commissie Koloniale Collecties (hierna: de Commissie) verzocht te adviseren over het teruggaveverzoek.

De beheerder van het object, het Rijksmuseum te Amsterdam, heeft onderzoek gedaan naar de herkomstgeschiedenis en heeft daarvan rapport uitgebracht (bijlage 1).

De Commissie heeft het teruggaveverzoek en het herkomstrapport besproken in haar vergadering van 9 januari 2023. De Commissie heeft dr. Alicia Schrikker als herkomstonderzoeker over dit rapport gehoord. Aangezien zij tevens lid is van de Commissie heeft zij niet deelgenomen aan de inhoudelijke beraadslaging en besluitvorming van de Commissie over dit object.

De Commissie had geen aanvullende vragen voor het herkomstonderzoek.

In januari 2023 heeft Commissielid dr. Schrikker in Colombo gesproken met verschillende vertegenwoordigers van de Ministeries van Cultuur en Buitenlandse Zaken, de senior presidentieel adviseur veiligheid, de Director General van het Department of National Museums en de Nederlandse ambassadeur. Zij heeft met hen gesproken over de voortgang van de behandeling van de teruggaveverzoeken en over mogelijke vervolgstappen.

Op 24 maart 2023 heeft de Commissie gesproken met drs. Taco Dibbits, directeur, en dr. Valika Smeulders, hoofd Geschiedenis, als vertegenwoordigers van het Rijksmuseum, de beheerder van de collectie. Daarbij hebben zij aangegeven het teruggavebeleid te ondersteunen en de samenwerking met het land van herkomst van de objecten belangrijk te vinden.

Het herkomstonderzoek is in Engelse vertaling gedeeld met vertegenwoordigers van Sri Lanka. Het herkomstonderzoek gaf geen aanleiding tot aanvullende vragen.

Op 24 maart 2023 heeft de Commissie het teruggaveverzoek opnieuw besproken en besloten te adviseren zoals hieronder weergegeven.

4. Het herkomstonderzoek

Het herkomstonderzoek is verricht door dr. Alicia Schrikker en Doreen van den Boogaart RMA in samenwerking met Senarath Wickramasinghe van het National Museum in Colombo. Alicia Schrikker en Doreen van den Boogaart waren ten tijde van het onderzoek werkzaam als herkomstonderzoekers in opdracht van het PPROCE project en in dienst van het NIOD.

Het rapport van het onderzoek is als bijlage bij dit advies gevoegd (*bijlage 1*). De inhoud van het rapport wordt beschouwd als onderdeel van dit advies. In het rapport hebben de onderzoekers - samengevat- de volgende bevindingen neergelegd.

“This highly ornamented Sri Lankan *kasthāné*, or sabre, has a hilt made of solid gold, shaped with four lion heads (*simhas*) and two female deities (*Saraswati* and *Sri Lakshmi*). It is decorated with 136 diamonds and 13 rubies. The wooden scabbard is coated with gold. The *kasthāné* is presented in the Rijksmuseum as a spoil of war, obtained by the VOC during the war with Kandy and its occupation of the palace in 1765. The object analysis indicates that this *kasthāné* was made in the royal Four Workshops of the Kandyan kingdom (*pattal hatara*). Experts in Sri Lankan arms and armour further suggest that the *kasthāné* was personal property of king Kirti Sri Rajasinha (r. 1747-1782). These conclusions are based on the material, art-historical features of the object and on information from scholarly literature.

The object most likely arrived in the collection of the Dutch Stadtholders (Willem IV and Willem V) prior to 1795 and was recorded first in 1816. However, it is not exactly clear what route the *kasthāné* took from Kandy into the collection of the Dutch stadtholders. The eighteenth-century archival trails of this object are incomplete. Various scholars have suggested that this object was among the spoils of war, which Dutch East India Company Governor of Ceylon, Lubbert Jan van Eck (in office 1762 – 1765), collected after the siege of the palace in 1765 and which were sent to his heirs in the Dutch Republic in 1768. There is indeed a description on the list, which was drawn up in Colombo on 22 October 1765, of an object that could be identified as this golden *kasthāné*. However, this identification requires some qualification: minor inconsistencies were found in the way the object was described at the time.

We have found no documentation of the transfer of this object by any of the heirs of Van Eck to the collection of the stadtholder. At the same time, we also have not come across evidence that would suggest another provenance. The exact moment of arrival of the golden *kasthāné* in the collection simply remained unrecorded. In the nineteenth and early twentieth centuries the Kandyan provenance was forgotten, and the gold mounted *kasthāné* was described as Javanese as late as 1957. Since 1965 the *kasthāné* has been catalogued as spoils of the Dutch Kandyan war by the Rijksmuseum together with the golden *pihiya*, the silver *kasthāné*, and Lewke’s cannon.”

5. Inhoudelijke beoordeling van het teruggaveverzoek

Het verzoek om teruggave is ingediend door een Staat waar Nederland langere tijd koloniaal gezag uitoefende en derhalve is de *Beleidsvisie collecties uit een koloniale context* van toepassing.

De Commissie is van oordeel dat het onderzoek deugdelijk is uitgevoerd en voldoende basis biedt om te kunnen adviseren. Er is grondig bronnenonderzoek gedaan en de bestaande kennis is kritisch geëvalueerd. Het rapport geeft een goede weergave van de vindbare informatie.

De Commissie heeft zich afgevraagd of hier sprake is van onvrijwillig bezitsverlies als bedoeld in het beleidskader. Daartoe overweegt zij als volgt.

In het rapport zijn vier kernvragen benoemd die helderheid verschaffen over de herkomstvraag. Naast het archiefonderzoek speelden materiaal- en kunsthistorisch onderzoek een grote rol. Uit het rapport komt het volgende naar voren.

Blijkt uit het materiaaltechnisch onderzoek dat de kastane een koninklijke oorsprong of eigenaar had?

Op basis van het materiaaltechnisch onderzoek en de decoratie is vastgesteld dat deze kastane is vervaardigd in de koninklijke werkplaatsen van Kandy. Aan de kwaliteit, kostbaarheid en de verfijning van werken uit die werkplaatsen kan worden afgeleid wat de status van de opdrachtgever of ontvanger was. In dit geval gaat het om een kastane met massief gouden (niet verguld) heft, rijk ingelegd met 136 diamanten en 13 robijnen. Decoratieve motieven op de kastane die specifiek wijzen op een koninklijke herkomst zijn de hoofden van leeuwen (simha) en de afbeelding van de godinnen Saraswati (godin van wijsheid) en Sri Lakshmi (godin van voorspoed), beide ook prominent afgebeeld op de troon van de koningen van Kandy. Ook de vergulde schede is rijk geornamenteerd.

Geraadpleegde experts op het gebied van Sri Lankaanse historische wapens concluderen op basis van het voorgaande dat dit een koninklijke ceremoniële kastane moet zijn geweest, één van de symbolen van het koningschap ofwel regalia.

Wat is in het museum en/of in de literatuur bekend over de herkomst van de kastane?

In 1765 werden Kandy en het koninklijk paleis aangevallen en verwoest door Nederlandse troepen onder leiding van de Nederlandse gouverneur van Ceylon, Lubbert Jan van Eck. Uitgaande van de juistheid van het deskundigenoordeel dat de kastane behoorde tot de regalia, moet deze ten tijde van de aanval op Kandy in eigendom zijn geweest van koning Kirti Sri Rajasinha, die regeerde over Kandy van 1747 tot 1782.

Wat is er bekend over de buit van de aanval op Kandy door de VOC in 1765, en in hoeverre blijkt uit de archieven van de VOC en de familie van Van Eck dat de kastane in verband staat met die buit?

Tijdens de inname en plundering van Kandy en het paleis zijn veel objecten buitgemaakt, waaronder sieraden en wapens. Van Eck overleed kort na de inname van Kandy. Zijn opvolger Iman Willem Falck liet de executeurs van de nalatenschap van Van Eck weten dat tien objecten in de nalatenschap oorlogsbuit uit Kandy waren. Hieronder bevond zich een “zwaart met goude greep en dies scheede met goud beslag”, dat mogelijk de gouden kastane is. Deze objecten werden overgebracht naar de VOC in Colombo. Het “zwaart met goude greep” werd door het bestuur van de VOC in 1768 vrijgegeven voor de nalatenschap van Van Eck en verscheept naar diens erfgenamen in de Republiek der Nederlanden. In de familiearchieven van Van Eck is een wapen met dezelfde omschrijving als op de VOC-lijst opgenomen.

Welke route heeft de kastane afgelegd na aankomst in Nederland en op welke manier is hij gepresenteerd?

Vermoed wordt dat de gouden kastane in de collectie van stadhouder Willem V is opgenomen en als oorlogsbuit is tentoongesteld in het ‘curiositeitenkabinet’ van de stadhouder in Den Haag. Ooggetuigenverslagen maken melding dat onder meer wapens in het curiositeitenkabinet werden tentoongesteld die waren buitgemaakt van de koning van Kandy: “(...) unter den kunstsachen eine ganz silberne kanone mit golde ubersogen, graviert, und mit edelgesteinen besezt, welche die Hollander in ihren lesten kriege, met den koninge von Candi erbeutet haben, und viele andre sehr kostbare Waffen”. Op de inventarislijsten van de collectie van Willem V is deze kastane echter niet te

identificeren. Aangezien bekend is dat die inventarislijsten allerm minst volledig zijn, is daarmee de aanwezigheid van de kastane in de collectie van Willem V ook niet uitgesloten.

De vroegste vermelding in een Nederlandse collectieregistratie die hoogstwaarschijnlijk deze kastane betreft, is in het Koninklijk Kabinet van Zeldzaamheden (KKZ) onder nummer A.154: "Een husaren sabel met gevest van massief goud met brillianten en 2 robijnen bezet – in een met goud gekleede schede." Deze lijst betreft objecten die in 1816 uit de collectie van koning Willem I, de zoon van stadhouder Willem V, zijn overgedragen aan het KKZ. De vermelding van twee robijnen in plaats van 13 kan worden verklaard doordat de kastane twee robijnen heeft die groter en prominenter geplaatst zijn dan de elf andere. Op basis van een vermelding door Jan van Campen wordt vermoed dat de lijst van 1816 correspondeert met de 'Lijsten van in januari 1795 meegenomen gouden en zilveren tafelhoed, schilderijen en kleding' die stadhouder Willem V meenam tijdens zijn verbanning naar Engeland in 1795 of in veiligheid liet brengen op zijn kasteel Oranienstein in Duitsland. Hieruit zou volgen dat de kastane in ieder geval vóór 1795 in Nederland was.

In een beschrijving door de directeur van het KKZ uit 1823 is melding gemaakt van de Sri Lankaanse herkomst van de groep objecten waarin ook de kastane was tentoongesteld. In een catalogus van het KKZ uit 1824 wordt "een Oostersche sabel, met een gevest van massief goud, bezet met brillianten en twee robijnen, in eene met goud bekleede schede" vermeld.

Vanuit het KKZ en via het Nederlandsch Museum voor Geschiedenis en Kunst is de kastane in 1927 opgenomen in de collectie van het Rijksmuseum. Het herkomstonderzoek heeft uitgewezen dat de Sri Lankaanse herkomst gedurende lange tijd, in ieder geval tot 1965, uit beeld verloren is.

Overwegingen van de Commissie

De Commissie is van oordeel dat op grond van de overwegingen in het herkomstrapport aannemelijk is dat de gouden kastane met inventarisnummer NG-NM-560 afkomstig is uit het paleis van Kandy en dat deze kastane als oorlogsbuit is geroofd in 1765. Hoewel de omschrijving in de inventarislijsten van Willem V ontbreekt en de omschrijving in de KKZ-registratie spreekt van een "husaren sabel" en van twee robijnen, is de omschrijving voldoende gelijkend om aan te nemen dat de getraceerde vermeldingen om deze gouden kastane gaan. De verschillende getuigenverklaringen en de omschrijvingen in 1823 en 1824 bieden hiervoor naar het oordeel van de Commissie voldoende grondslag. Ook uit de nummering van de museumkaartjes komt naar voren dat het om hetzelfde object gaat. Er bevinden zich in de Nederlandse collecties ook geen andere hiermee vergelijkbare objecten. Er is actief gezocht maar geen aanwijzing gevonden dat de gouden kastane langs andere weg in Nederland is gekomen.

Het Rijksmuseum gaat zelf ook al decennialang uit van roof als herkomst en er zijn geen aanwijzingen gevonden die wijzen op iets anders.

De Commissie is op vorenstaande gronden, vervat in het herkomstrapport, van oordeel dat met een redelijke mate van zekerheid is aangetoond dat het verzochte cultuurgoed onvrijwillig is verloren in een land waar Nederland langere tijd koloniaal gezag uitoefende. De Commissie adviseert op grond van het voorgaande tot onvoorwaardelijke teruggave van de kastane vanwege het onvrijwillige bezitsverlies.

De Commissie is gevraagd te adviseren over de toepassing van artikel 4.18 van de Erfgoedwet indien het advies inhoudt dat de gevraagde objecten moeten worden teruggegeven. Naar het oordeel van de commissie prevaleert in dit geval het herstel van het onrecht uit het verleden en komt toepassing van artikel 4.19 Erfgoedwet daarom niet aan de orde.

6. Het advies

De Commissie heeft het teruggaveverzoek beoordeeld en adviseert de Staatssecretaris tot onvoorwaardelijke teruggave van de kastane met inventarisnummer NG-NM-560 aan de Republiek Sri Lanka.

Dit advies is vastgesteld door de Commissie Koloniale Collecties op 12 mei 2023.

De voorzitter

De secretaris

Summary of findings

This highly ornamented Sri Lankan kashhāné, or sabre, has a hilt made of solid gold, shaped with four lion heads (simhas) and two female deities (Saraswati and Sri Lakshmi). It is decorated with 136 diamonds and 13 rubies. The wooden scabbard is coated with gold. The kashhāné is presented in the Rijksmuseum as a spoil of war, obtained by the VOC during the war with Kandy and its occupation of the palace in 1765. The object analysis indicates that this kashhāné was made in the royal Four Workshops of the Kandyan kingdom (pattal hatara). Experts in Sri Lankan arms and armour further suggest that the kashhāné was personal property of king Kirti Sri Rajasinha (r. 1747-1782). These conclusions are based on the material, art-historical features of the object and on information from scholarly literature.

The object most likely arrived in the collection of the Dutch Stadtholders (Willem IV and Willem V) prior to 1795 and was recorded first in 1816. However, it is not exactly clear what route the kashhāné took from Kandy into the collection of the Dutch stadtholders. The eighteenth-century archival trails of this object are incomplete. Various scholars have suggested that this object was among the spoils of war, which Dutch East India Company Governor of Ceylon, Lubbert Jan van Eck (in office 1762 – 1765), collected after the siege of the palace in 1765 and which were sent to his heirs in the Dutch Republic in 1768. There is indeed a description on the list, which was drawn up in Colombo on 22 October 1765, of an object that could be identified as this golden kashhāné. However, this identification requires some qualification: minor inconsistencies were found in the way the object was described at the time. We have found no documentation of the transfer of this object by any of the heirs of Van Eck to the collection of the stadtholder. At the same time, we also have not come across evidence that would suggest another provenance. The exact moment of arrival of the golden kashhāné in the collection simply remained unrecorded.

In the nineteenth and early twentieth centuries the Kandyan provenance was forgotten, and the gold mounted kashhāné was described as Javanese as late as 1957. Since 1965 the kashhāné has been catalogued as spoils of the Dutch Kandyan war by the Rijksmuseum together with the golden pihya, the silver kashhāné, and Levke's cannon.

Introduction and context

This provenance report focuses on NG-NM-560, a golden-hilted kashāné currently displayed in the Rijksmuseum, Amsterdam in room 1.5: *The Netherlands overseas*. The current narrative adopted by institutions and researchers is that this kashāné, together with a golden pihya (NG-NM-7114), a silver-hilted kashāné (NG-NM-7112), a cannon (NG-NM-1015), and two wall-guns (NG-NM-519 and 520) were spoils of the Kandyan-Dutch war (1762-1766) and obtained during the violent, ruthless plundering of the Kandyan palace in 1765.

In this provenance report we assess the material and archival evidence that has been used to support the presentation of golden hilted kashāné as part of the spoils of war and discuss the current gaps in our knowledge regarding this object. In the report we will therefore answer the following questions:

- 1) Which material elements support the thesis that the golden kashāné was of royal origin?
- 2) What knowledge is available in the museum and the literature regarding the provenance of the object?
- 3) What is known about the objects that were looted during the siege of the palace and town of Kandy in 1765 by the VOC?

- 4) To what extent do the eighteenth-century archival records from the VOC, the family archive of Van Eck, and the Royal Archives (KHA) provide us with concrete evidence that connects the golden kashhāné to the Kandyan-Dutch war of 1762-1766?
- 5) What route did the golden kashhāné take through the Dutch collections?

The research was conducted in collaboration with experts from the Sri Lankan National Museum in Colombo and the conservation and science department of the Rijksmuseum Amsterdam.

Object information

The golden kashhāné was analysed in the Atelier of the Rijksmuseum Amsterdam on 25 November 2021 together with colleagues from the conservation and science department. The metal measurements and analysis of the stones were shared with Senarath Wickramasinghe from the Sri Lankan National Museum. He further analysed the decoration on golden kashhāné with the help of a series of detailed photos that were made on 18 May 2021 and on 25 November 2021. Based on these and previous data, his earlier publications on Kandyan arms, Senarath Wickramasinghe provided us with his analysis of the object, which we have integrated in this overall object analysis.

Kashhāné were ceremonial swords or sabres and not used as fighting swords. The kashhāné came in different qualities, and can in general be divided into two categories: 'up-country' kashhāné (referring to the mountainous area of the Kandyan kingdom) and 'low-country' (referring to the island's maritime regions that were partially occupied by the Dutch) kashhāné. Kashhāné from the low country (i.e. the area under Dutch rule) were coarser, both in design and in material used.¹ The Rijksmuseum holds an example of such a low country kashhāné: NG-1982-18, in this case the hilt is made of carved wood.² For the Kandyan nobility, kashhāné were part of their formal custom when in function. Kashhāné were typical gifts from the Kandyan king to his highest nobles in reward for their service and on occasion were used as diplomatic gifts.³ The king had decorative objects such as jewellery, swords, and chains made in the Four royal workshops (*pattal hatara*) for this purpose.⁴ The craftsmen from the *pattal hatara* worked almost exclusively for the court and their positions were hereditary. The Four Workshops were divided, respectively, into the "jewel," "crown," "golden sword," and "throne" workshops. Kashhāné produced in the royal workshops were all high quality, yet the exact quality in terms of design, decoration, and material of the kashhāné signified the rank to whom the object was gifted: the more decorated (i.e. use of figures, gems, silver, gold), the higher the rank of the receiver.⁵

The ceremonial function of Kasthāné at the Kandyan court are described in travel reports and in drawings and paintings of Kandyan chiefs and noblemen by Dutch artists in the eighteenth century.⁶ For example, in 1681 Robert Knox observed:

When he [the Kandyan King] first promotes them [the Adigar] (...) he (...) gives them a sword, the hilt all carved and inlaid with silver and brass very handsomely, the scabbard also covered with silver — a knife, and halberd; and lastly, a town or towns for their maintenance.⁷

Dutchmen were also gifted with sabres or swords described as “silver-hilted” occasionally during their diplomatic embassies to the Kandyan king.⁸ We do not know what these swords looked like, but we know that the king perceived the Dutch as vassals, and therefore may have treated the ambassadors the same as his chiefs and gifted them with the same kind of gifts, including kasthāné.⁹

⁹ At the last audience during the yearly embassies by the VOC to the Kandyan Court, it was customary that gifts were also given back to the ambassador, his secretary, and the interpreter. The gifts depended on the rank of the VOC official. Ambassadors usually received silver swords [kasthāné?], golden chains, and golden rings set with stones. The secretary got a golden chain and rings and the interpreter only a chain. Sometimes, when the ambassadors pleased the king, they would also receive an elephant. T. B. H. Abeysinghe. "Embassies as Instruments of Diplomacy: A Case Study of Sri Lanka in the First Half of the Eighteenth Century" *Journal of the Royal Asiatic Society Sri Lanka Branch*, 1985/86, New Series, Vol. 30 (1985/86), p. 17-18; In this Sinhalese account of a Dutch embassy to the court of Kandy in 1731-32 the word kasthāné is literally used for the sabre gifted to the Dutch ambassador: Paul E. Pieris, "The Dutch embassy to Kandy in 1731-32." *The Journal of the Ceylon Branch of the Royal Asiatic Society of Great Britain & Ireland*, vol. 21, no. 62, Royal Asiatic Society of Sri Lanka (RASSL), 1909, pp. 187–220: 213.

Although silver *kasthāné* were more commonly gifted, golden *kasthāné* do also appear in the historical records. We have therefore considered the question whether the use of gold as such was indeed exclusively reserved for the royal household. For example, *maha mudaliyar* Nicolas Dias Abeysinghe Amasekera, the highest local official in service of the Dutch, also carried a golden *kasthāné*. Jan Brandes, who drew him in his formal attire (Photo 2), describes this *kasthāné* as a “golden sword.”¹⁰ But other than that, we do not get an impression of the quality of this *kasthāné*. We assume, however, that the *kasthāné* of the *maha mudaliyar* was gilded, rather than made of solid gold. In 1754, Governor General Mossel received a sabre (*houwer*) that was described as gilded (“een houwer met goud beslag”).¹¹ The occasion was very special, as the gifts were meant to thank the Governor General in his assistance in reaffirming Kandy-Siamese relations. In travel literature and reports from ambassadors, the swords of the kings of Kandy were often described as being made of gold, rather than gilded.¹²

If *kasthāné* were also used as ceremonial and diplomatic gifts, what then makes this golden *kasthāné* so special? Material analysis shows how this object stands out in various ways. Measurements made of the *kasthāné*'s metal composition made on 25 November 2021 revealed that the hilt of the golden *kasthāné* is made of solid gold (rather than gilded). For that reason, the hilt is extraordinarily heavy and it was impossible to make an x-ray.¹³ The hilt is inlaid with 136 diamonds and 13 rubies. In 2021 Dr. Hanco Zwaan of the Netherlands' Gem Laboratory in Leiden and the Conservation & Science staff of the Rijksmuseum closely analysed one ruby and identified it as Myanmar (Burmese) in origin.¹⁴ The wooden scabbard is coated with gold. Peter Dekker, an art dealer with extensive knowledge of Sri Lankan arms, was also present on 26 November 2021 and he agreed that the golden *kasthāné* was exceptional for its use of solid gold, precious stones, and motifs.¹⁵

Senarath Wickramasinghe concludes that this golden *kasthāné* was a royal ceremonial sword of rank.¹⁶ The king's regalia indeed consisted of a crown, sword, and shield, among other things.¹⁷ In the words of Wickramasinghe: ‘The Sword was one of the weapons among the five auspicious objects of king/s of Sri Lanka called “*Magul Kaduwa*” (auspicious sword). Every king of Sri Lanka used

Please note that this report will be available via the Documentation folder of the Rijksmuseum Amsterdam from April 2022.

¹⁵ Regarding the symbolic importance of solid gold we notice the following: the Kandyan envoys who travelled to the court of Siam in 1750 paid particular attention to the objects at the Siamese court and throughout this Sinhalese report explicit distinctions are made between objects that were gilded and objects made of solid gold, see: P. E. Pieris, ‘An account of king kirti sri's embassy to siam in 1672 saka (1750. a.d.) Translated from the Sinhalese’ in: *Journal of the Royal Asiatic Society of Sri Lanka*, 2003, New Series, Vol. 48, Special Number: Commemoration of the 250th anniversary of Upasampadā in Sri Lanka (2003), pp. 111-148.

its own sword when he became a king. This was also the case with Kirti Sri Rajasinha, who received his sword on 20 May 1749. It was an important occasion that was celebrated in Kandy with a feast, as the Dutch were informed on 12 May 1749:

‘On 20 May a party is to take place at the court of Kandy to celebrate the moment that the king was to accept the sword of state [goud swaart van staat]. He will be driven around the streets of Kandy in his horse carriage.’¹⁸

The “Magul Kaduwa” was worn on ceremonial occasions and was used to represent kingship of Sri Lanka.’¹⁹ To substantiate this, he provided us with an analysis of the decoration of the gilt, hilt, grip, and knuckle guard:²⁰

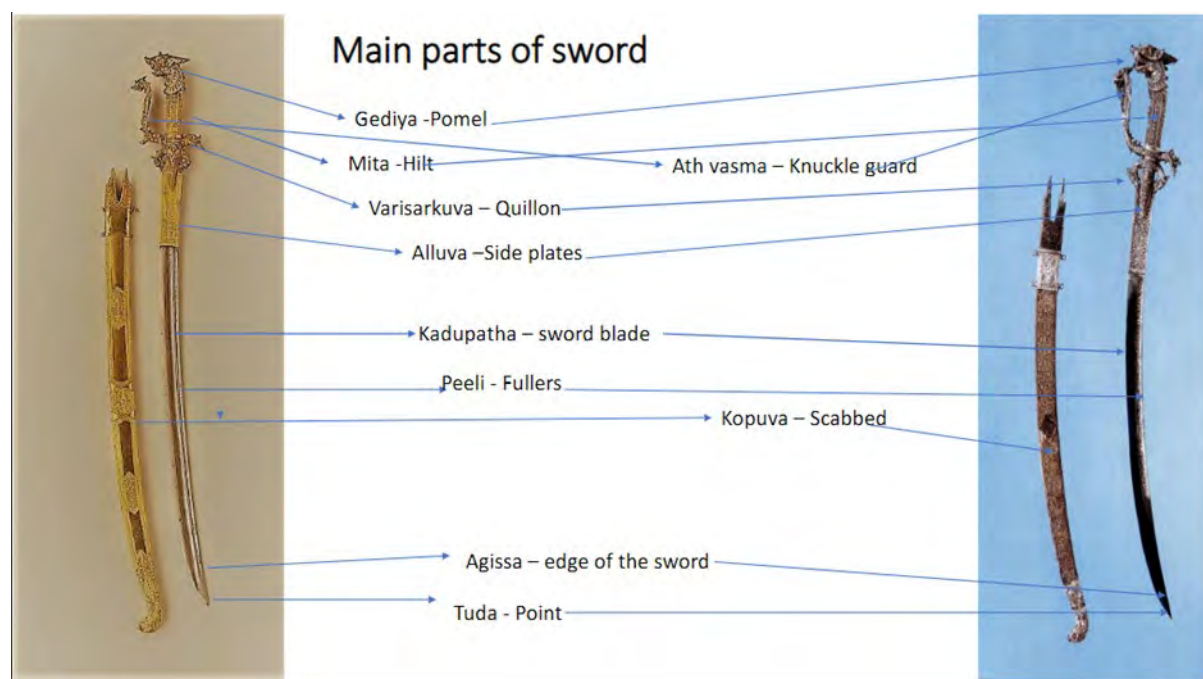

Photo 3: Infographic with an Explanation of the different parts of a *kasthāné*, by Senarath Wickramasinghe

He describes the typical Kandyan motifs on the *kasthāné*'s hilt as follows: ‘the pommel (Gediya) is an elegantly executed *simha* (lion) head with a prominent backwardly directed conical crest. A series of *liya-pata* (flowery) ornamentation continues for a short distance on the backside. The eyes of the *simha* (lion) are decorated with rubies. The grip is eight sided and has three finger grooves with three whorls of *liya-pata* (palapeti), and is set with diamonds. The grip surface is set in separate panels, each of which is chased with floral decoration, those on the right and left showing *sinamala* ornaments.

¹⁹ Report Senarath Wickramasinghe, Director (Cultural) Department of National Museums, Sri Lanka, ‘Assessment of the draft provenance report of the three objects’ 10 February 2022. Please note that documentation on this will be available via the Documentation folder of the Rijksmuseum Amsterdam from April 2022. In addition, we found the following information: Pybus, *Account of Mr. Pybus’s Mission to the King of Kandy*, 77,78. In 1762 John Pybus visited the court of Kandy as ambassador of the British East India Company’s and he described the king’s attire as follows: ‘Kirti Sri Rajasinha was wearing a golden dagger with a golden hilt, set with gold and precious stones and next to him, leaning against his throne was a large broad sword of gold with a hilt richly set with precious stones.’ Although this description leaves some room for interpretation, it confirms the importance of gold and diamonds.

²⁰ Presentation Senarath Wickramasinghe, “Ancient swords, daggers, and knives in Sri Lankan museums,” *Expert meeting Sri Lankan objects Rijksmuseum*, 27 August 2021. Please note that documentation on this will be available via the Documentation folder of the Rijksmuseum Amsterdam from April 2022.

The knuckle guard (Ath Vasma) has two short quillon terminating in the *simha* head. The outer and inner surface of knuckle guard is elaborately decorated and holds two seated female figures that are integrated with a *liya-pata* design. The inner surface seated female figure can be identified as goddess *Sarasvathi* (goddess of knowledge). The outer surface seated female figure can be identified as goddess *Sri Lakshmi* (goddess of prosperity). Crucially, the presence of these deities signifies royal ownership, as they are also prominently depicted on the Royal Throne of the Kings of Kandy. This throne was made in 1692 as a present for King Vimala Dharma Suriya II (1687-1707).

Photo 4: Saraswati, the goddess of knowledge, on the inside of the knuckle guard of the golden mounted kashānē. NG-NM-560. (Photo by authors).

Photo 5: Sri Devi Lakshmi, the goddess of prosperity, on the outside of the knuckle guard of the golden mounted kashānē. (Rijksmuseum, Amsterdam, inv.no. NG-NM-560).

Photo 6: the Kandyan throne,
courtesy Colombo National Museum

The quillon (Varisarkuva) is shaped in the form of a *makara* (dragon's) head. The rectangular ricasso is embossed with an overlay of gold floral ornamentation. The blade (Kadupatha) is slightly curved with an upturned cutting edge meeting the reverse edge of the blade's tip. A distinct fuller (peeli) is present.

Photos 7 and 8: Details of quillon and blade of golden mounted kashhane. (Rijksmuseum, Amsterdam, inv.no. NG-NM-560).

The *kopuva* (scabbard) is made of wood, its upper end is V-shaped and is made of gold covered with floral designs and is followed by two gold lockets in between the three shorter golden bands. The edge of the scabbard is curved backward with *hamsa* design (i.e. with an *agissa* [edge] and *tuda* [point]) at the end. In comparison to the scabbards of other *kasthāné* kept in the National Museum in Colombo, this scabbard stands out as quite distinctive with its intricate and elegant ornamentation.²¹

Photos 9 and 10: Scabbard of golden mounted *kasthāné*. (Rijksmuseum, Amsterdam, inv.no. NG-NM-560).

The *kasthāné* has an European blade. The practice of using European blades for the *kasthāné* was common in the seventeenth and eighteenth centuries. These blades often bear the mark of the Dutch East India Company (VOC). The blade of the golden *kasthāné* is partly overlaid with gold, but it does show the faint remains of an inscription: on one side the remains of the inscription starts with an 8 and a C, there might also have been a V and Z or 72 or 78. The other side shows a D and E. As we could not further decipher this inscription, we cannot date the blade.

On the basis of the analysis of the motifs and the material used, Senerath Wickramasinghe's suggested that the golden *kasthāné* might have been made at the same time as the Kandyan throne, which would be in the late seventeenth century. So far, we have not found other information to date the *kasthāné*, and the similarity in style and motifs between the throne and the golden *kasthāné* remains the only lead.

To conclude, the object analysis shows that the exquisitely decorated golden *kasthāné* is a unique object and the technique, motif and material used attest to its royal origin. The similarities to the Kandyan throne suggest that it indeed once belonged to the king of Kandy and that it might have been made in the late seventeenth century. The specific identification of this object with King Kirti Sri Rajasinha has been based on literary and archival evidence from curators of the Rijksmuseum and other researchers who have proposed that the object was part of the spoils of war in 1765. This will be further discussed in the following section.

²¹ Report and assessment Wickramasinghe, 27 August 2021 and 10 February 2022.

Present knowledge regarding provenance available in the Rijksmuseum and literature

The golden *kasthāné* is a well-known object and is described in various Rijksmuseum catalogues and specialist publications on Sri Lankan and South Asian arms and armours.²² The various authors consistently suggest that the *kasthāné* was part of the spoils of the Kandyan-Dutch war and that it was presented as a gift to the Dutch stadtholder Willem V by the executors of Governor van Eck's estate. Where does this information come from?

The golden *kasthāné*, together with the silver *kasthāné* (NG-NM-7112) and the golden *pihiya* (NG-NM-7114), first became the objects of research in the 1960s when two near-simultaneous exhibitions were being prepared: one in the Dutch National Archives (then called Algemeen Rijksarchief) on the history of the VOC in Sri Lanka (then called Ceylon) (*Ceylon-Nederland in het verleden 1602-1797*), and one memorial exhibition on the Dutch royal collections, *Koninklijk Kabinet van Schilderijen, Koninklijke Bibliotheek en Koninklijk Penningkabinet*.²³ Professor Th. H. Lunsingh Scheurleer, who was affiliated with the Rijksmuseum, worked on the latter.²⁴

Correspondence between the Rijksmuseum and the Dutch National archives in 1965 show how both parties were looking for archival evidence on the provenance of these three objects, in addition to their search for extra information on Levke's cannon, which had already been the object of research.²⁵ The National Archives provided the museum with copies from the VOC archives regarding the spoils of the Kandyan-Dutch war of 1765, dated 22 October 1765 (though misread at the time as 22 December 1765).²⁶ Copies from the estate of Governor van Eck from his family archives were also added as evidence of the objects' provenance. It was on the basis of this documentation that the curators concluded that together with the cannon, the golden *kasthāné*, and the two other objects, the golden knife (NG-NM-7114) and the silver *kasthāné* (NG-NM-7112) were spoils of the Kandyan-Dutch war. It was subsequently described as such in both exhibition catalogues.²⁷ Curiously though, Lunsingh Scheurleer connected the golden *kasthāné* to the golden 'belly-dagger' (*buikstekker*) from the list (which we ascribed to the golden *pihiya*, see PPROCE report NG-NM-7114).²⁸

²⁶ Ibid.

²⁷ Lunsingh Scheurleer, *150 Jaar: Herdenkingstentoonstelling*, 74.

²⁸ The description in the catalogue read as follows: "176 Singalese sabel (*Kasthāné*). Sabel met massief gouden gevest ingelegd met 136 diamanten en 13 robijnen. Houten schede geheel bekleed met goud. Het gevest, dat in zijn hoofdvorm aan Europease voorbeelden herinnert, is versierd met een grote en vier kleine leeuwenkoppen. De gouden bekleding van de schede is in twee delen uitgevoerd, verbonden door een overeenkomstig met beide delen versierde ring. De kling, zeer eenvoudig voor een dergelijk wapen, is ten dele belegd

Here Lunsingh Scheurleer was clearly mistaken. The word *buiksteker* (lit. belly-dagger) refers to a waist-knife, rather than a sabre or sword. The word *buiksteker* was not commonly used at the time in the Dutch Republic, but we found a reference from Bengal in the same period, explaining that a *buiksteker* was a dagger carried around the waist.²⁹ Historically, the word *houwer* (sabre) or sword would have been used to describe a *kasthāné*.

In 1975 the director of the National Museum in Colombo, P. H. D. H. de Silva, undertook the laborious task of identifying all Sri Lankan objects and manuscripts that were kept in collections outside Sri Lanka. His overview was published under the title *Antiquities and Other Cultural Objects from Sri Lanka (Ceylon) and Abroad*.³⁰ This has become a classic reference work and in 1980, De Silva's catalogue formed the basis of a large restitution request of the Sri Lankan government, which was unsuccessful.³¹ Among the described Sri Lankan objects in the Rijksmuseum we also find NG-NM-560, De Silva stresses the royal origins and uniqueness of the object:

N.M. 560 – A *kasthāné* sword, probably belonging to King Kirti Sri Raja Sinha, King of Kandy [...] sword with a massive golden hilt inlaid and with 136 diamonds and rubies. Wooden scabbard encased in gold covering with exquisite ornamentation. [...]

And following Lunsingh Scheurleer, he added:

“described in the daily register of Colombo on December 22nd 1765 as a ‘handsomely worked belly-stabber with gold overlay.’”³²

In the registration form of NG-NM-560 made in 1984, J.B. Kist summarised the attributed provenance of the *kasthāné* as a Sinhalese sabre, with historical associations with the VOC, Ceylon, and Kandy. He further mentioned that it was said to be a state jewel of Kandy due to the following provenance:

Presumably captured during the confiscation of Kandy and described in the daily register of Colombo of December 22, 1765 and in the inventory of Gouverneur van Eck, drawn up after his death.³³

It was presented at the time in the “Ceylon vitrine” of the Rijksmuseum, a show case with objects from Sri Lanka.

met goud. De *Kasthāné* is meer een waardigheidsteken dan een wapen. Het is mogelijk, dat dit zeer kostbare wapen aan de Koning van Candia heeft toebehoord; l. 81 cm.

Herkomst: vermoedelijk buitgemaakt bij de inneming van Canida – en beschreven in het dagregister van Colombo 22 december 1765 als: "Fraay gewerkte Buijsteker met goud beslag" getaxeerd op 129 rijksdaalders. In de boedelbeschrijving van L.J. Baron van Eck, opgemaakt na zijn dood in 1765, beschreven als: "Een fraije gewerkte Buijk-Steker met goud beslag en dies scheede met steentjes beset." In 1816 (lijst nr 5) door Koning Willem I overgedragen aan het Kon. Kab. v. Zeldzaamh.; in 1883 overgebracht naar Amsterdam."

³³ Rijksmuseum documentation, Registratieformulier, NG-NM-560, 1984; 'Vermoedelijk buitgemaakt bij de inneming van kandy en beschreven in het dagregister van Colombo van 22 december 1765 en in de boedelbeschrijving van Gouverneur van Eck, opgemaakt na zijn dood.'

Researchers who published on this group of objects more recently, such as Lodewijk Wagenaar, Pauline Lunsingh Scheurleer, and Ebeltje Hartkamp-Jonxis, did not question the assigned provenance of the golden kashāné, the golden pihya, and silver kashāné.³⁴ In the most recent publication, *Cinnamon and Elephants*, Lodewijk Wagenaar writes that these three objects were gifted, together with the cannon (NG-NM-1015) to Duke Louis Ernest of Brunswick-Wolfenbüttel, who transferred them to Stadtholder Willem V. The golden kashāné, as well as the golden pihya and the silver kashāné would have been taken by the Dutch army in Kandy.³⁵

Since 2015, the Rijksmuseum label has described this group of objects as follows:

Following an unsuccessful invasion of Kandy in 1764, the VOC troops nevertheless succeeded one year later in penetrating the king's centre of power. Peace negotiations failed and the troops plundered the palace and the city. The booty included many costly jewels and arms, including these three ornate weapons that were probably the king's personal property.³⁶

What we want to highlight here is that the information gathered in 1965 has circulated ever since as unquestioned fact. It appears that subsequent researchers have not looked up the original documentation in the Van Eck estate, nor in the VOC archives. This is evidenced by the recurring references in the literature of 22 December rather than 22 October 1765 as the first date when the looted objects collected by Van Eck were listed.³⁷ The documentation gathered in 1965 requires further scrutiny. How were the objects from the lists in the VOC archives and the Van Eck family archives identified? Where the objects indeed gifted to stadtholder Willem V (via the Duke of Brunswick) in conjunction with the cannon? How and when did these objects, including the golden kashāné, arrive in the collection of the Rijksmuseum in the first place? And what was known about them at the time? We will start with answering this last question first.

The Kandyan-Dutch war 1762-66 and the spoils of war

The association between Lewke's cannon and the golden kashāné, the golden pihya, and the silver kashāné is very strong. This was also the ground on which they were connected with the Kandyan-Dutch war in the 1765 and to the estate of Governor van Eck. What exactly is known about the objects that were obtained in the war? What information is provided in the VOC archives and the family archives of Van Eck? And can we indeed identify the golden kashāné in Van Eck's estate?

The Kandyan-Dutch war of 1762-1766 is commemorated in both Sinhala and Dutch primary sources, and in both cases the looting of objects plays a prominent role. A royal historical chronicle from Sri Lanka, the *Cūḷavamsa*, describes how the king of Kandy decided to support popular resistance against the VOC. "[His] dignitaries set forth with the people living in Lanka, fought the fearful battle with the Olanda people, destroyed the foe, burned down the strongholds and terrified him in every

possible way.”³⁸ Conflicts between the Dutch and the local inhabitants of the Dutch occupied areas had started in 1759/60 but in 1761 the restrained relations between the Dutch in Colombo and the king of Kandy led to open warfare.³⁹ VOC Governor Lubbert Jan van Eck got hold of the Kandyan lowlands in 1762 and 1763, whereupon he decided to invade the town and palace of Kandy up in the mountains. The first campaign of early 1764 failed completely.⁴⁰ Even after the Dutch VOC troops invaded the city of Kandy on 19 February 1765, the Kandyan defence used guerrilla tactics, by retreating fast after an attack and using the rainy season to their advantage.⁴¹

During the days before the invading of Kandy, the king brought to safety his family and the treasures of the Kandy Palace and Temple of the Tooth.⁴² An eyewitness, a Dutch soldier who worked as surgeon in Kandy, described the situation as follows: “The King, with tears in his eyes, had caused the most precious objects to be removed from the Palace, and had then given leave to his troops to take what they wished of the remainder [treasures].”⁴³ This was not in vain as the Temple of the Tooth, the most important Buddhist shrine on the island, was targeted by the Dutch army and when they forced their way into the town, the palace and temple were razed by the troops and they “destroyed the sacred books and everything else.”⁴⁴ The court was desecrated due to the slaughtering of the holy cows and the destruction of the Buddha statues and the palace was set on fire when the Dutch troops eventually retreated from the city due to strong resistance and a lack of food on 31 August 1765.⁴⁵

The troops invading the city on 19 February 1765 were explicitly instructed not to plunder, but upon arrival in Kandy, the Dutch troops had found the warehouses partly emptied by the retreated Kandyan troops, who were allowed to do so by the king.⁴⁶ The looting that followed spread from the warehouses to even the apartments of the king himself.⁴⁷ Among the objects taken were linen, fabrics, furniture, some silverwork objects, curiosities, and copper coins.⁴⁸ Officers, soldiers, and slaves alike went looting. For instance, it is recorded that back in Kandy one officer had taken “silverworks, diamonds, and rings with and without stones”.⁴⁹ This officer had defended himself later

⁴⁹ NL-HaNA, 1.04.02, 3138, Copia secreete brief van den gouverneur alleen aan generaal en raden in dato 10 November 1765 [Copy of the secret letter from the Governor [Falck] only to the general and boards, dated 10 November 1765], f. 366b-367: “De kannekappel van La Baume die hier voor een ordentlijk man te boekstaande schillie Christoffel fernando, waar op La Baume zich, als zijnghe slaagen vijand, beriep heeft verklaard, dat hij veele gouden ringen met en sonder steenen, zoo ook veel ander klein zilverwerk bij La Baume gezien had, waar van de kostbaarste ring aan den Her Kommandeur Mooijaart, toen ter tijd op Kolombo zich bevindende, voor 80 Rijkst door hem kannekappel verkocht was.”

in Colombo by saying that he had bought the objects from two soldiers, just as Governor Van Eck himself had done. In fact, Van Eck had also bought several valuable and rare objects from the spoils. "Those objects might have been sold for give-away prices to Moors who were waiting to buy it,"⁵⁰ he wrote. Indeed, a great deal of the booty was sold or left behind by the soldiers in Kandy or during their trip back to Colombo after the retreat of the troops from Kandy at the end of August 1765.⁵¹

Governor van Eck died some weeks after the conquest of Kandy and in his estate ten Kandyan objects were identified as spoils of war. These ten objects were described as follows:

- A golden container with a golden ola as well as a small bag with small golden balls attached
- A Buddha statue made of tombac
- An ivory machine with underneath a metal disk, that has an engraving in it
- A small canon piece inlaid with silver
- A fine decorated bow with golden mounting, together with an equally decorated quiver and arrows.
- A sword with golden grip and its sheath with golden mounting together with a part epee [sword knot] with silver mounting
- A red-lacquered baton of command with on both ends golden studs
- A fine decorated belly-knife with golden mounting
- A silver gold plated machine as a clock with underneath a fitting bottom piece
- A kind of palate/canopy with pillars of gold but overlaid with gold and silver.⁵²

Of these ten objects we propose that the 'sword with golden grip and its sheath with golden mounting' could possibly be identified as the golden *kasthānē*. The ten objects were delivered to the big cash register [grote geldkas], which was commissioned by Hoofdadministrateur Daniel Burnat. By then, the decorated cannon had already been shipped to the Netherlands (on 15 November 1765), as the late Governor Van Eck had wished. It was sent as a gift to Duke Louis Ernest of

Brunswick-Wolfenbüttel, the guardian of Willem V. On 13 May 1766 the headquarters of the VOC in Batavia gave permission to send the Kandyan objects that were left of Van Eck's estate to his heirs, provided that court in Kandy would not demand restitution.⁵³ Two objects from this list, namely, the Cover of the Tooth of Buddha (the silver-gilded machine) and the accompanying howdah (the canopy) were indeed returned in 1767 to the king of Kandy as a result the peace negotiations.⁵⁴ The golden container with golden ola was returned to the 'owner' from whom Van Eck had taken it, because he had never paid for it as he had promised.⁵⁵ In 1768 there were six objects left described as "curiosities that were found [gevonden] during the conquest of the Palace of the King of Kandy and looted [buitgemaakt]." These were sent to the heirs of Van Eck on the ship *Vrouwe Petronella Maria* in a box with the initials VE.⁵⁶

In the family inventory of Van Eck's estate, the objects are described once again and in more detail. Although the cannon is also on this list, it is explicitly referred to as not among the objects received from Colombo, because it was sent directly to the Duke of Brunswick. The inventory states: "It is now part of the cabinet of rarities of the Stadtholder in The Hague."⁵⁷ The estate of Lubbert Jan van Eck indeed mentions the "swaart met een gouden greep en dies scheede met goud beslag" (a sword with a golden grip and a scabbard overlayed with gold).⁵⁸ The description is the same as in the inventories made in Colombo immediately after his death.⁵⁹ Curiously, it was appraised in Colombo at the time at 30 rixdollars (comparable to ca. 700 euro's today)⁶⁰, which seems low for a sword with a hilt of massive gold, and decorated with 138 diamonds and 13 rubies. As referred to in the PPOCE provenance report of NG-NM-1015, it appears that other objects in that list too were under-appraised at the time.⁶¹ At this point it is relevant to mention that none of these lists of spoils of war confiscated by Van Eck describe this "sword with a golden hilt" as being ornamented with precious stones, nor are its other decorative elements mentioned. Moreover, the sword with golden grip and its sheath with golden mounting recorded on Van Eck's list are described as having an accompanying *port-épée* (leather or cloth that is attached to the belt to support a sword or scabbard) with silver mounting. We have not yet been able to identify this *port-épée* in the collection of the Rijksmuseum collection or its predecessors.

The unrecorded arrival of the golden kashāné in the collection of the Dutch Stadtholder

Our analysis of the history Van Eck's estate showed that the golden kashāné arrived in the Dutch Republic in 1768, separately from Lewke's cannon. This means that it could not have followed the same trail into the stadtholder's collection. We have therefore tried to reconstruct the moment of the kashāné's arrival in the collection of the Stadtholders: first through an analysis of the eighteenth century inventories of this collection and second by searching for correspondence with the heirs of Van Eck in the years after the arrival of the kashāné and the other objects from his estate.

Our search through the eighteenth-century inventories of the collection of Stadtholders Willem IV and Willem V did not yield any result.⁶² In fact, none of the other five Kandyan objects were found in these eighteenth century inventories either, including the Lewke's cannon. Nor did we find any letters from the heirs of Van Eck relating to golden kashāné or the pihya. A better understanding of the collection history and archives might help explain the silence with regard to the golden pihya and the other Kandyan objects.

Because the descriptions of the objects in the estate of Van Eck are quite generic, and because of the longstanding tradition in Kandy of bestowing diplomatic gifts to governors and governor generals, we also looked more broadly into the Stadtholder's correspondence regarding objects arriving from Asia. The cabinet consisted of the collection that Willem V and his wife, Wilhelmine of Prussia, inherited from Willem IV and his wife, Anna van Hannover. The acquisitions made subsequently reflect their personal tastes, while the objects they received as gifts reflect their relations, networks, and socio-political positions. A considerable part of Willem V's cabinet was formed by gifts from the territories exploited by the West India and Dutch East India Companies.⁶³ Indeed the archive of Willem V does show several instances of donations of art-historical and natural-historical objects, as well as weapons and other personal belongings to the stadtholders. Several letters from or about Governor-General P.A. van de Parra (1761-1775) inform us for example that he donated a great variety of objects, including weapons, to the collection of Willem V and also

⁶² Koninklijke Verzamelingen [Royal Collections] (NL-KaHV), A, William IV, prince of Orange, ruler of Nassau (1711-1751), inv.no. 46 III, 'Bekorte Staat en Inventaris van het Kabinet der Natuurlijke en door Kunstgemaakte Zeldzaamheden...' Vosmaer en Willem V over restanten van de stadhouderlijke collecties die naar Duitsland verzonden kunnen worden' [Correspondence between W.C. Vosmaer and Willem V on what was left of the stadtholder's collection that could be shipped to Germany] dated 1803.

Also consultation of the inventory of the Vosmaer family did not give any result. The following numbers are part of the section of Arnout Vosmaer as director of the stadtholder's cabinets. NL-HaNA, 2.21.271 'Inventaris van het archief van de familie Vosmaer' [Inventory of the archive of the Vosmaer family], inv. no. 63-67.

⁶³ Edwin Van Meerkerk, "Colonial Objects And The Display Of Power. The Curious Case Of The Cabinet Of William V And The Dutch India Companies," in *The Dutch Trading Companies as Knowledge Networks*, ed. Siegfried Huigen, Elmer Kolfin, and Jan L. de Jong (Brill, 2010): 415-416: 422.

to the family of the stadtholders themselves.⁶⁴ Yet, there was no golden kasthāné among them or anything that might resemble it.

As a final step in our search for evidence regarding the arrival of the kasthāné in the collection of the Stadtholder, we looked at contemporary descriptions of the display at the Cabinet for Curiosities. The cabinet can be considered as the first public museum in the Netherlands. The cabinet attracted many visitors.

Indeed we found that Kandyan objects do appear in a written account from the German traveller Carl Heinrich Titius from 1777. When Titius visited the Cabinet of Curiosities of Willem V, he explicitly mentioned that he saw a silver cannon with gemstones, and noted that the cannon was taken by the Dutch in their last war with the king of Kandy. No doubt this refers to NG-NM-1015 (see PPOCE report). Titius further remarked that other weapons are exhibited in that same room.⁶⁵ He did not further elaborate on those other weapons. Nevertheless, a guide from 1785 on the museum of with the collection of Stadtholder Willem V, described yet another room that was filled with armour, clothing, and other ornaments from inhabitants of the island of Ceylon (Sri Lanka), other Indian countries, and China.⁶⁶

To conclude, the estate of Van Eck indeed lists an object ('a sword with a golden grip and a scabbard overlaid with gold') that could possibly be identified as the golden kasthāné. Yet, we have not been able to find direct evidence of the transfer of this object to the collection of Stadtholder Willem V. We have explained though that this by no means excludes the option that it was gifted by Van Eck's heirs to the Willem V for the simple reason that the archival recording of objects in the possession of the Dutch stadtholder was incomplete. The eyewitness accounts reveal that the curator of the Cabinet made explicit reference to the Kandyan-Dutch war and that besides Lewke's cannon, other armour from Ceylon (Sri Lanka) was at display at the time.

When was the object first recorded and what route did it make through the Dutch collections?

The archival silences regarding the arrival of golden kasthāné in the collection of the Dutch Stadtholder urged us to further scrutinize the museum documentation. In this section we focus on two questions: when was the object first recorded as part of a Dutch collection? And what route did it take through the collection? Our method was to work backwards in time through the museum documentation, this exercise included the decoding of the somewhat complex historical numbering of the object.

The Rijksmuseum as it exists now was built in 1885 and it incorporated the collections of various national museums that had been established over the course of the nineteenth century. These predecessors of the Rijksmuseum were in turn founded on older collections such as the eighteenth

⁶⁴ See for example, NL-KaHV, A31, William V Batavus, Prince of Orange-Nassau (1748-1806), Inv. No. 1798, P.A. van de Parra 1767-1775, dated 27 July 1772; NL-KaHV, A31, William V Batavus, Prince of Orange-Nassau (1748-1806), Inv. No. 1799, J. van Riemsdijk 1776-1777.

⁶⁵ Carl Heinrich Titius from 1777 cited by Johann Jacob Volkmann, *Neueste Reisen durch die vereinigten Niederlande* (Den Caspar Fritsch, Leipzig, 1783). "In zweeten saale ist unter den kunstsachen eine ganz silberne kanone mit golde ubersogen, graviert, und mit edelgesteinen besezt, welche die Hollander in ihren lesten kriege, met den koninge von Candi erbeutet haben, und viele andre sehr kostbare Waffen." century Cabinet of Curiosities of the Dutch Stadtholder Willem V.

The inventory cards of the golden kashāné (NG-NM-560) consist of five sides full of notes and references. The card originates from the Nederlandsch Museum voor Geschiedenis en Kunst (Dutch Museum for History and Art, or NM as in “NG-NM-560”), which became integrated in the collection of the history department of the Rijksmuseum in 1927. The first entry read as follows:

Malay sabre with golden hilt and scabbard, completely overlaid with ornaments and fantastic heads. Decorated with 136 diamonds and 13 rubies.

See Van de Kastele’s booklet p. 132. Attributed to Michiel Adriaansz. De Ruyter. Damaged on several places. Marked A. 154, catalogues Mauritshuis number 27.⁶⁷

Clearly in 1927 the Sri Lankan origins of the kashāné was forgotten, and in fact in the nineteenth century somebody had connected the kashāné to Michiel de Ruyter. Most of the notes on the card relate to confusion about its origin. Below we disentangle this information.

The number A. 154 cited on the card leads to a description of a list of objects that have been transferred by King Willem I from his collection to the Koninklijk Kabinet van Zeldzaamheden in 1816. On this list, number A. 154 is described as “Hussar sabre with a solid gold hilt set with brilliants and 2 rubies – in a gold gilded sheath.”⁶⁸ The original version of this list is in the National Archive, but a copy in the dossier in the Noord-Hollands Archief that holds the archive of the Koninklijk Kabinet, some interesting notes with pencil are made next to A. 154: “That means Turkish-eastern? NM-560.”⁶⁹ That it was described as hussar apparently confused this anonymous reader, while “Turkish-Eastern” reflects that the golden hilted kashāné was not recognised at the time by this person as Kandyen or Sri Lankan. As the NG part of the object number is not mentioned in this note, we might conclude that the anonymous author of the notes could have written this between 1875 and 1927, when the collection of Nederlandsch Museum was not yet integrated with the Rijksmuseum. It was after 1927 that the Rijksmuseum added the NM objects to the Dutch History (Nederlandse Geschiedenis – NG) collection in 1927.⁷⁰

⁶⁷ Inventory card Rijksmuseum Amsterdam NG-NM-560: ‘Maleijische sabel met gouden gevest en schede, gehele gedreven met opgelegde ornamenten en met fantastische koppen. Versierd met 136 diamanten en 13 robijnen. Zie het boekje van Van de Kastele p.132. Toegeschreven aan Mich. Adr. de Ruyter. Hier en daar beschadigd. Op een perkamentje gemerkt A.154, cat. Mauritshuis No. 27.’

⁶⁸ “Een hussaren sabel met gevest van massief goud met brillianten en 2 robijnen bezet – in een met goud gekleede schede,” NL-HaNA, 2.04.01, inv.no. 4030, ‘Bijlage 1. Degens, Sabels en Stokken’ [Attachment 1. Swords, Sabers and Sticks], dated 6 July 1816, no. 37.

⁶⁹ “Een hussaren sabel met gevest van massief goud met brillianten en 2 robijnen bezet – in een met goud gekleede schede,” NL-HlmNHA, 476, inv.no. 843, ‘Lijst van voorwerpen op last van Koning Willem I overgedragen aan het Kon. Kab. v. Zeldzaamheden te ‘s-Gravenhage’ [List of objects transferred to the Royal Cabinet of Curiosities in The Hague on the orders of King William I], 1816.

⁷⁰ Jan van Campen et al., *Aziatische kunst* (Amsterdam: Rijksmuseum, 2014): 8-11.

It is striking that only a mention of two rubies is made in this first possible description of the object. The golden *kasthāné* has 13 rubies. However, we observe that two are larger than the other eleven, and these two stand out as eyes of the *simha* head on the pommel. This might explain a misinterpretation of the smaller rubies, perhaps they were also unclear, overlooked, or identified as brilliants (elaborately cut gemstones). This description, however, was not questioned in the subsequent years. Ca. 1824, in the guide of the Koninklijk Kabinet van Zeldzaamheden op het Mauritshuis by its director, R.P. van der Kastelee, desk 14 in room 4 is described as housing “Asiatic objects.” One of these is an “Eastern sabre, with a hilt of massive gold, set with brilliants and two rubies, with a gold-coated sheath.”⁷¹

The golden *kasthāné*, the golden *pihiya*, and silver *kasthāné*, were not the only Kandyan/Sri Lankan objects in the collection of the Koninklijk Kabinet van Zeldzaamheden. In fact, it appears that these objects belonged to a group of objects from Sri Lanka in the KKZ collection. Over the course of the nineteenth century, their Sri Lankan provenance was forgotten, but in 1823 this was not yet the case: in 1823, the contemporary director of the Koninklijk Kabinet van Zeldzaamheden, R.P. Van de Kastelee, described that desk 13 in the fourth room presented a range of Asiatic objects. Among them were a treatise in Sinhalese and a decorative belt with a snake motif, ‘worn by the people of Ceylon’.⁷² Van der Kastelee explicitly stated that these objects originated from the cabinet of Stadtholder Willem V. On desk 15 in the same hall, the objects were exhibited which we now identify as the golden *kasthāné*, together with the silver *kasthāné*, the golden *pihiya*, and another Kandyan knife which is now in the Wereldculturen collection (or: NG-NM-560, 7112, -7114 and RV-360-6017). In addition, two *olas* (palm leaf manuscripts) with Tamil and Sinhalese script were exhibited together with a copper plate with Sinhalese letters and an “Eastern writing pen,” presumably a stylus, used to write on the palm leaves.⁷³ A conclusion we can draw from these records is that the golden *kasthāné* was exhibited as part of a group of objects that originated from Sri Lanka.

The myth of Michiel de Ruyter

Over time, however, the knowledge about this group of objects had faded, and furthermore, for a period the golden *kasthāné* was separated from the other Sri Lankan objects: it was identified as a relic of the Dutch national hero Michiel de Ruyter.

In the inventory of the Koninklijk Kabinet van Zeldzaamheden made in the period 1878-1882, number 6020 is once more described as “Hussar sabre with a solid gold hilt set with brilliants and 2 rubies – in a gold covered sheath.”⁷⁴ This inventory was reconstructed in 1966 by Professor Lunsingh

⁷¹ R.P. Van de Kastelee, *Handleiding tot de bezichtiging van het Koninklijk Kabinet van Zeldzaamheden op Mauritshuis, in 's Gravenhage* (The Hague, n.d. [1824]): 104. “Een Oostersche sabel, met een gevest van massief goud, bezet met briljanten en twee robijnen, in eene met goud bekleede schede.” However, in this catalogue, this description is found on page 104, not 132, that the inventory card indicates. A mention of a sabre on page 132 is not found. It could be possible that another edition was consulted.

⁷² Van de Kastelee, *Handleiding tot de bezichtiging*, 97-101. “Eene onbegrijpelijk kunstige van zilverdraad gevlochten slang, de kop en de staat schijnen daar naderhand aangemaakt te zijn; zonder deze is het een versiersel van een volk op Ceilon, wordende als een gordel om het lijf gedragen, wanneer aan de einde sluitingstukken zijn. Weegt 5 ons, 16 eng. Of 268,411 wig.” We have not yet identified this object in the collection.

⁷³ *Ibid.*

⁷⁴ NL-HlmNHA, 476, inv.no. 1092, “Inventaris van kunstvoorwerpen, door het Nederlandsch Museum van Geschiedenis en Kunst ontvangen van het Koninklijk Kabinet van Zeldzaamheden” [Inventory of art objects, received by the Nederlandsch Museum van

Scheurleer and the Director of the Rijksmuseum van Volkenkunde (NMvW Museum Volkenkunde), P.H. Pott. Regarding the numbers 6014-6029 in the collection of the Koninklijk Kabinet van Zeldzaamheden, Pott noticed that these numbers were (almost) completely copied from the list of the objects King Willem I had transmitted to the KKZ from his father's collection. Some of these ended up in the museum Volkenkunde, while others went to the Nederlandsch Museum. Pott was able to trace back almost all of the numbers from the list in the two museums. In the Rijksmuseum these were renumbered in between NM-7053 and -7121.⁷⁵ However, NM-560, the golden kashāné that is discussed in this report, is not part of that number range, although it was number 6020. An explanation for this is that the object was transferred earlier to the Nederlandsch Museum. On the record of the Koninklijk Kabinet van Zeldzaamheden of 1878-1882, number 6020 (NM-560) is said to be "absent."⁷⁶

The kashāné was among the first objects from the collection of the Koninklijk Kabinet van Zeldzaamheden that were transferred to the Nederlandsch Museum for its Dutch national history exhibition.⁷⁷ Michiel de Ruyter played a large and triumphant role in this exhibition. The reason why the golden kashāné became separated from the other Asian objects in the KKZ and was transferred to the Nederlandsch Museum at this early moment is because it was mistaken for a "Turkish sabre of Michiel de Ruyter." Curiously, it was not the only Sri Lankan object that was assigned to Michiel de Ruyter; the same happened to the cannon of Kandy as well as the wall guns.⁷⁸

On the museum inventory card, a further connection is made between the golden kashāné and an auction of the estate from one of De Ruyters descendants, Cornelis Steengracht, in 1782. At this auction Stadtholder Willem V bought two sabres from Michiel de Ruyter.⁷⁹ One of these sabres might be presented in 1795, together with the cannon of Kandy (NG-NM-1015) as two of the five most important pieces in the history of the newly established Batavian Republic. It was described as "sword of the famous Dutch sea hero and admiral De Ruyter."⁸⁰ In 1800 the five objects were displayed in the Nationale Konst Gallerij at Huis ten Bosch. The description of the first relic reads: "de Zydgeweren [sabres/daggers] van den Admiraal de Ruyter, benevens deszelfs Staf van Commando."⁸¹ A year later, the swords of de Ruyter are again described, now in a catalogue of the Nationale Konst Gallerij again in plural, as well as his staff of command.⁸² The objects from the Nationale Konst Gallerij, found their way to several (royal) museums, and eventually were transferred in 1825 to the Koninklijk Kabinet van Zeldzaamheden.⁸³ Clearly there has been a mix-up

Geschiedenis en Kunst from the Koninklijk Kabinet van Zeldzaamheden], 1875. "Een huserensabel met massief gouden gevest met brillanten en twee robijnen bezet. In een met goud overtrokken scheidde."

here of different sabres. After all, we know with near certainty that the golden *kasthāné* was transferred to the KKZ from the Stadtholders Cabinet of Curiosities in 1816. This is also what R. Luttervelt, curator of the Rijksmuseum history department from 1946 to 1963, concluded in an article in 1957. Yet he described the sabre as Javanese rather than Kandyan or Sri Lankan.⁸⁴ What this whole episode signifies, beyond the curious anecdotal information, is that over the course of the nineteenth century the Sri Lankan past of these objects, including the golden *kasthāné*, was totally forgotten. This situation lasted well into the twentieth century.

But if it did not arrive in the collection via the auction of Steengracht's belongings in 1782, how then do we know it had been part of the stadtholders' collection? The list of 1816, where it was recorded as a "hussar sabre," appears to have been a copy of an original list kept in the National Archives, which contains objects that were handed over by King Willem I to the Koninklijk Kabinet van Zeldzaamheden. Van de Kastele, its director, received these from de hofraad Hoffman. According to Jan van Campen, this list referred to the objects that Willem V took with him to England when he was exiled in 1795.⁸⁵ However, Tom Quist has suggested that this list is a copy of Hoffman's inventory on the weapons and walking sticks, written in German. In Tom Quist's view, the listed remained at Oranienstein Castle.⁸⁶ This was the residence of Willem V since 1801. (See Provenance report RV-360-6021, Tom Quist). We have not been able to obtain further information on this question, but it is in any case very likely that the golden *kasthāné* and other objects on the German-language list were transferred to England or Germany or both, and returned to the Netherlands in the period 1813-1816 when the monarchy was established, with Willem V's son, Willem I. From the museum documentation we can thus conclude that the golden *kasthāné* must have arrived into the collection of Willem V, at any moment prior to his exile in England and Germany in 1795.⁸⁷

⁸⁷ This stay rejects the thesis of in the Rijksmuseum documentation that NG-NM-7112 as well as NG-NM-560 were the two weapons that, like NG-NM-1015 (Cannon of Kandy), were presented as one of the five objects, the "vaderlandsche gedenkstukken" to the new Batavian Parliament, as symbols for a new Netherlands in 1795. Among them was the sabre of Michiel de Ruyter and a cannon ascribed to the Ruyter. The cannon can be identified as NG-NM-1015 (see report), but the sabre presented there cannot be linked to NG-NM-7112. See also: Van Luttervelt, 'Herinneringen Aan Michiel Adriaenszoon de Ruyter', 36.

Discussion

The object analysis clearly showed that the golden *kasthāné* originates from the Kandyan Kingdom. This object being one of the most exclusive examples known of this era was made in the royal Four Workshops (*pattal hatara*) and will have belonged to the king of Kandy. The motifs and the use of solid gold, diamonds and rubies attest to this. Most probably it was owned by king Kirti Sri Rajasinha. From Dutch and Sinhalese records, we know that the palace and temple of Kandy were looted in 1765, during the Kandyan-Dutch war. The VOC archives recorded objects of the spoils of war such as royal decorated arms, including a sword with a golden grip- and a gold mounted sheath. This sword was also recorded in the estate of Governor Van Eck, and we know that this object was sent together with other objects to the heirs of Van Eck in the Dutch Republic. Here the direct archival trail from Colombo stops. We know that the objects from the estate of Van Eck were allotted among his heirs, but it was not specified which object was sent to whom, nor whether it was gifted to the Dutch stadholder afterwards. The museum documentation and old inventories however showed that it is most likely that the golden *kasthāné* arrived in the collection of the Stadholders prior to 1795.

As it is well known that *kasthāné* were occasionally used as diplomatic gifts, we have looked for archival traces before and after the war to see if such gifted *kasthāné* were donated to the stadholder at other moments. But so far we have not found any evidence that would support this hypothesis.⁸⁸ For that reason and because of its obvious royal connotation it seems most likely that the golden *kasthāné* is indeed the “sword with a golden grip” from the estate of Van Eck. When and how it was transferred to the stadholder remains unknown.

A final point that bears emphasis is that for over fifty years now the Rijksmuseum has maintained that the golden *kasthāné* was part of the spoils of the Kandyan-Dutch war. Together with the cannon, the silver *kasthāné*, and the gold mounted knife, they have come to symbolise the moment of plunder and destruction of the Kandyan palace. This in itself has thus become an important part of the object’s history.

⁸⁸ During the PPROCE research a start was made with mapping the culture of gift-giving between the VOC and Kandy in the 1740s and 1750s, as well as to what happened to the objects after they were in VOC hands. A draft document ‘Gift giving, Embassies and Collections’ will be available in the documentation folders of this object from April 2022. An elaboration on this research went beyond the object of the PPROCE research, but future elaborate research on the practice of gift giving, flows of gifts, as well as the afterlives of these Kandyan gifts in Sri Lanka, the Netherlands and the rest of the world could provide more insight. The draft documents can be consulted as a starting point for future research.
