Public stakeholder consultation on the Euratom Research and Training Programme

Fields marked with * are mandatory.

The Euratom Research and Training Programme 2014-2018 (<https://ec.europa.eu/programmes/horizon2020/en/h2020-section/euratom>) is the European programme for funding research and training in nuclear safety, radiation protection, waste management and fusion. The Euratom Programme aims at the continuous improvement of nuclear safety and the management of radioactive waste, and advances our understanding of the effects of ionising radiation on humans and the environment. The Euratom Programme contributes also to the optimisation of the use of radiation in medical applications. Fusion research supported by the Euratom Programme aims at implementing the roadmap to the realisation of fusion electricity by 2050.

We invite everyone, and in particular research stakeholders, to take part in this consultation in the context of the interim evaluation of Euratom Programme, and to have a say on the Euratom research and training activities. The results of this consultation will help us to improve the implementation of the Euratom Programme and will feed into the preparations of the proposal for the extension of this Programme for 2019-2020.

This questionnaire will take around 20 minutes to respond. At the end of the questionnaire there is an opportunity to upload a position paper.

Part A - About you

Part A consists questions about the respondent. We would like to know who our respondents are in order to better understand their perspective, expectations and needs in terms of research and innovation. It will also help us to tailor this survey to respondents' experiences with the Euratom Research and Training Programme.

PART B - Your opinion on the current Euratom Research and Training

Programme (http://ec.europa.eu/research/participants/data/ref/h2020/legal_basis/fp/h2020-euratom-establact_en.pdf)

In part B, we would like to know whether the Euratom Programme's priorities and forms of funding respond to current research challenges as well as to the needs and expectations of stakeholders. Some questions in this part are addressed to participants in Euratom projects and focus on different aspects of the Programme's implementation. This part also takes a closer look at the costs and benefits of participation in the Euratom Programme as well as at the EU added value of the Programme.
