

## Lijst van Beschermwaardige Houtopstanden 2019

Het college van burgemeester en wethouders

Besluit:

De Lijst van Beschermwaardige Bomen 2019 vast te stellen.

### 1 Inleiding

Bomen verdienen bijzondere aandacht en bescherming in de stedelijke omgeving. Ze zijn belangrijk voor de beleving en de leefbaarheid, voor ecologie, klimaat en klimaatadaptatie. En bomen hebben verschillende waarden, waaronder natuurwaarde, esthetische en economische waarde en kapitaalswaarde.

De gemeente Haarlem heeft de Lijst van Beschermwaardige Houtopstanden samengesteld. Op deze lijst staan de gemeentelijke waardevolle en monumentale bomen en monumentale bomen van andere eigenaren. Ook zijn de bomen die voorkomen in het landelijk register van monumentale bomen van de Bomenstichting opgenomen. In paragraaf 2 zijn de criteria beschreven waaraan de bomen moeten voldoen om op de lijst te worden geplaatst.

De bomen op deze lijst genieten een bijzondere status en bescherming. In de Bomenverordening Haarlem (2012) is de bescherming vastgelegd; in het groenbeleid zullen visie, ambities en beleid betreffende groen, waaronder bomen, worden vastgelegd. De Haarlemse Lijst van Beschermwaardige Houtopstanden is een dynamisch bestand, dat elke drie jaar opnieuw door het college zal worden vastgesteld. In paragraaf 3 is de procedure van actualisatie beschreven.

Hoewel de bomen op de lijst extra bescherming genieten en de lijst regelmatig geactualiseerd wordt, blijft het mogelijk dat er bomen incidenteel door storm, ziekte of andere oorzaken toch in een zodanig slechte en gevaarlijke toestand vervallen dat ze gekapt moeten worden.

In deze lijst zijn ruim 250 bomen van andere zaakgerechtigden dan de gemeente opgenomen (bijlage 1) en bijna 2800 monumentale en waardevolle bomen in beheer bij de gemeente Haarlem. Van alle bomen op de lijst is weergegeven:

- Het boomnummer (uniek nummer dat alle monumentale bomen hebben die niet in eigendom zijn van de gemeente en dat alle gemeentelijke bomen hebben);
- De redengevende beschrijving (zoals gedenkboom, monumentale boom);
- De soort boom;
- De standplaats van de boom (locatie als adres of RD-coördinaten);
- De eigendomsgegevens (gemeentelijk of andere zaakgerechtigde);
- De geschatte leeftijd van de boom.

Van de gemeentelijke bomen is de standplaats genoteerd in rijksdriehoekskoördinaten, van de bomen die niet bij de gemeente in eigendom en beheer zijn, is de standplaats als adres genoteerd. De lijsten zijn opgenomen in bijlage 1 en 2. Alle bomen op de Lijst van Beschermwaardige Houtopstanden zijn te vinden op de website met opendata van de gemeente Haarlem, als lijst en op plattegrond <https://www.haarlem.nl/opendata/open-data-lijst/#/>. Ter attentie: op de plattegrond moet sterk ingezoomd worden op bomen zichtbaar te krijgen.

### 2 Criteria

De Lijst van Beschermwaardige Houtopstanden bestaat uit gemeentelijk waardevolle bomen en monumentale bomen in gemeentelijk eigendom en in eigendom van andere eigenaren. Een deel hiervan valt ook onder het Landelijk Register van Monumentale Bomen.

#### *Voorwaarden voor monumentale bomen*

De voorwaarden waaraan bomen moeten voldoen om in het Landelijk Register van Monumentale Bomen te worden opgenomen, zijn als volgt:

1. De boom moet een minimale leeftijd van 80 jaar hebben.
2. De boom dient voldoende gezond te zijn en een levensverwachting te hebben van minimaal 10 jaar.
3. De boom moet verder voldoen aan één van de volgende criteria:
  - is beeldbepalend voor de omgeving;
  - is cultuurhistorisch waardevol: standplaats is een belangrijk plek in de (lokale) geschiedenis;

- is dendrologisch waardevol: zeldzame soort of variëteit;
- is natuurwetenschappelijk of ecologisch waardevol: is het een moederboom, herbergt de boom bijzondere planten en/of dieren;
- heeft zeldzaamheidswaarde: omvang, hoogte, ouderdom of anderszins opvallend in provinciaal of landelijk perspectief.

De voorwaarden waaraan bomen moeten voldoen om in Haarlem als monumentale boom te worden opgenomen, komen hier vrijwel mee overeen:

Bijzondere beschermwaardige boom of houtopstand van 80 jaar of ouder met een levensverwachting van minimaal 10 jaar en die voldoet aan één van de volgende criteria:

- beeldbepalend;
- cultuurhistorische waarde;
- dendrologische waarde;
- natuurwaarde of zeldzaamheid.

De monumentale bomen betreffen zowel gemeentelijke bomen als die in eigendom van particulieren en overige zaakgerechtigden.

#### *Voorwaarden voor gemeentelijk waardevolle bomen*

De voorwaarden waaraan bomen of houtopstanden moeten voldoen om te worden opgenomen zijn dat zij:

- Een bijzondere schoonheid- of zeldzaamheidswaarde vervullen, of;
- Een bijzondere historische functie voor de omgeving vervullen, bijvoorbeeld de gedenkbomen, of;
- Een leeftijd van 50 jaar of ouder heeft bereikt met een levensverwachting van minimaal 10 jaar en beeldbepalend is.

### **3 Procedure**

In 2019 zijn alle monumentale bomen in eigendom van particulieren of andere zaakgerechtigden dan de gemeente geïnventariseerd door een onafhankelijke deskundige. Eens per drie jaar zal deze inventarisatie geactualiseerd worden. Zaakgerechtigden kunnen ook bij de gemeente aanmelden dat zij mogelijk een monumentale boom hebben en de aangemelde bomen zullen dan in de eestvolgende inventarisatie worden meegenomen. Geïnventariseerd wordt of de bomen aan de criteria voldoen. Als de bomen voldoen, komen ze de op Lijst van Beschermwaardige Houtopstanden. Na vaststelling van deze lijst door het college van B&W, worden de zaakgerechtigden geïnformeerd en kunnen zij desgewenst bezwaar maken. Bij bezwaar zal indien nodig een onafhankelijke deskundige om advies worden gevraagd.

Eens in de drie jaar worden alle bomen in beheer bij de gemeente Haarlem gecontroleerd, de zogenaamde VTA-controle. Kwetsbare en oudere bomen worden zo nodig vaker gecontroleerd. Bij deze controle worden bijzonderheden, waaronder monumentale waarde en daarbij behorende gegevens, geregistreerd. Vanaf december 2019 zal meer aandacht worden gevraagd door actualisatie van de leeftijd van gemeentelijke bomen.

Eens per 3 jaar wordt de Lijst van Beschermwaardige Houtopstanden opnieuw vastgesteld door het College van B&W.

De Lijst van Beschermwaardige Houtopstanden zal eens per drie jaar opnieuw worden vastgesteld door het college van B&W. De zaakgerechtigden zullen dan per brief worden geïnformeerd en kunnen binnen 6 weken bezwaar aantekenen.

Het feit dat de monumentale bomenlijst opnieuw is vastgesteld, zal via de gemeentelijke website worden gepubliceerd. Alle bomen op deze lijst zijn op het Opendatasysteem te vinden.

*Haarlem, 19 november 2019*

*de secretaris,*

*de burgemeester,*

**Bijlage 1 Monumentale bomen in bezit van andere zakelijk gerechtigden dan de gemeente**
