

## **Overzicht Nederlandse deelname aan EDA-projecten en –projectteams Stand van zaken 22 oktober 2007**

### Integrated development teams:

IDT Command  
IDT Inform  
IDT Deploy  
IDT Sustain  
IDT Protect  
IDT Engage

### Projectteams:

CBRN explosive Ordnance Disposal  
CBRN Detection Identification & Monitoring  
Maritime Surveillance  
Medical  
Software Defined Radio  
Satellite Communication (procurement cell)  
Operational intelligence: Universal Intelligence Analyst's Tool  
Tactical Imagery Exploitation Station Capability  
Network Enabled Capabilities

### Categorie A Programma (gezamenlijk investeringsprogramma):

Joint Investment Programme on Force Protection

### Categorie B R&T Projecten (projecten van kleinere groepen lidstaten):

Vulnerability Reduction Technologies for Large Maritime Composite Structures  
Insensitive munitions & Ageing  
NBC Modelling & Simulation  
Protection of Armoured Fighting Vehicles Against EFP  
Development of ultra fast molecular diagnostics  
Database of B- Agents  
Emerging Satellite Technologies, System Trends and Space Utilisation  
NEMESIS: Naval environment modelling & electro magnetic signature of surface targets for improved simulations  
MINERVE  
KORRIGAN : Key Organisation for Research on IC in GaN Technology  
STAMP : Surface-Mounted Technologies for Active Modules Production  
SYNTAS : Synthesis Tooling for Antenna Structures  
RUMBLE : Sea-bottom roughness measurement by use of low frequency sonar  
ALOA : Advanced Low Observable Materials  
SPREWS : Signal Processing for Radar and EW Systems  
TRAM : Development of New Transparent Materials for Armour Applications  
SMRF : Scalable Multi-Function Radar Programme (SMRF)  
SIMPLE : Scalable Multi-Function Radar Programme Implementation  
LARA : Layered Architecture for Real-Time Applications  
SpaceBASAR : Next generation Space Based military SAR systems and technologies  
UCAV : study Unmanned Combat Aerial Vehicles  
EW-COMARMS : EW Common Modular Architecture for Mission Simulation  
SATGROUND : Satellite ground segment and processing techniques TA 109

IDEALS: Integrated Detection & Estimation Algorithms Solutions (for data processing & fusion)

Protection of vehicles against mines

Radio Frequency Biological Effects

Simulation Based Acquisition - SBA –

UUV Covert Acoustic Underwater Com

Novel Materials and Concepts for Low Burden NBC Protective Clothing systems

Assesment of lightweigt low-cost carbon fibre components & struct for Armoured Fighting Vehicles

DINCS : Distributed Intelligent Networked Control systems ISTAR Operations by Space Based Imagery

Radar Simulation Framework

Prototype Dem. of SHMS on MP
