1 General Information

1.1 Notes

The test results of this test report relate exclusively to the test item specified in 1.5. The CETECOM ICT Services GmbH does not assume responsibility for any conclusions and generalisations drawn from the test results with regard to other specimens or samples of the type of the equipment represented by the test item. The test report may only be reproduced or published in full. Reproduction or publication of extracts from the report requires the prior written approval of the CETECOM ICT Services GmbH.

1.5 Information about test item

Description of the Test Item:

Type Identification: ePassport with Shielding A

Serial Number: ZZ0009876

Hardware Version: Software Version:

Description of System under Test

(SUT):

secure contactless chip inlay

Additional Information The ePassport contains a shielding. Therefore special care needed to be taken in

the positioning of the ePassport at the Test PCD Assembly during the test. The

test has been beformed with the ePassport opened completely.

1.8 Test standard/s

The following standards and recommendations form the basis for the tests as reported in this document.

BSI TR-03105; ePassport Conformity Testing, part 2	2006-03-30	Test Plan for ICAO compliant MRTD with secure contactless integrated circuit, Version 1.03.1
ICAO RF protocol and application test standard for E-Passport, part 2	2006-12-07	Tests for air interface, initialisation, anticollision and transport protocol

Test report no.: 1-0510-01-01/08

2 Technical Tests

2.1 Summary of Test Results

\boxtimes	No deviations from the technical specifications were ascertained
	There were deviations from the technical specifications ascertained

In this document those tests are reported which have been performed to investigate the terminal's ability to support the ePassport behaviour as specified in the BSI ePassport Conformity Testplan v1.03.1 (based on ISO/IEC 14443 and ISO/IEC 10373).

The following list shows those test cases which have been performed and the result which was achieved. A more detailed report of the single test cases is then following in the next section of this test report.

2.2 Test Environment

Temperature: +22 °C,

Relative humidity content: 55 %

Other parameters:

2.3 Measurement and Test set-up

Note: The test configuration is in accordance with the requirements given in the standards in point 1.8.

2.4 Test Equipment utilised

To simplify the identification of the test equipment used on each page of the test report, each item of test equipment and ancillaries such as probes are identified throughout the report by numbers in brackets according to the table below.

No.	Instrument/Ancillary	Source	Inventary ID
1.	ISO 10373-6 Test Apparatus	Arsenal Research	300003401
2.	Modified ISO 10373-6 Test Apparatus	Arsenal Research, modified by CETECOM	300003402
3.	Micropross MP300TCL1	Micropross	300003383
4.	TX/RX-Antenna	Micropross	300003383
5.	Spy-Antenna	Micropross	ISN:TNB198
6.	Calibration Coil	Arsenal Research	300003403
7.	Active Probe LeCroy HFP 100 P6202	LeCroy	300003417
8.	LeCroy Digital Storage Oscilloscope	LeCroy	300003390
9.	RF Amplifier 50 W	Amplifier Research	AR13503
10.	Control PC	Toshiba	300003365

Test report no.: 1-0510-01-01/08

2.5 Test results

During the testing of the ePassport the following test cases were performed. With each test case the achieved result is given. The test report does not contain log traces which might have been taken during the performance of the test. However, for reproducibility and clarification these are kept available at CETECOM archive.

2.5.1 Test Case 5.1 (BSI TR-03105; ePassport Conformity Testing, part2) Coil Dimension Check (Type A and B)

Not selected

2.5.2 Test Case 5.2 (BSI TR-03105; ePassport Conformity Testing, part2) Static Electricity (ESD) Test (Type A and B)

Not selected

2.5.3 Test Case 5.5 (BSI TR-03105; ePassport Conformity Testing, part2) Alternating Magnetic Field Test (Type A and B)

Not selected

2008-05-21 Page 15 of 22

Test report no.: 1-0510-01-01/08

2.5.4 Test Case 6.1 (BSI TR-03105; ePassport Conformity Testing, part2) Load Modulation Amplitude

The purpose of this test is to determine the sideband levels of the inlay. Method of measurement and test environment see conditions of ISO / IEC 14443-2. This test has to be performed for ePassports of both types (A and B).

The sideband levels shall be more than $[mV] = 30/H^{1.2}$. For meeting this limit the measured sideband voltage for the upper and lower sideband must be higher than: 18.44 mV at 1.5 A/m

4.93 mV at 4.5 A/m 3.49 mV at 6.0 A/m 2.67 mV at 7.5 A/m

Test Conditions:

Parameters	Date of test	Number of Samples	Passed tests	Failed tests
Field strength 1.5 A/m, 4.5 A/m, 7.5 A/m Temperature RT, -10 °C, 50 °C	2008-05-21	1	1*1	0

Test Results:

Sample 1:

Conditions		1.5 A/m	4.5 A/m	7.5 A/m (6 A/m @ 50 °C)	Result	
Data rate Normal	Normal	Lower sideband [mV]	32,50	33,46	29,61	Daga
fc/128	temperature	Upper sideband [mV]	30,76	31,19	(6 A/m @ 50 °C)	Pass
Data rate	High	Lower sideband [mV]				not
fc/128	temperature	Upper sideband [mV]			50 °C) 29,61	selected
Data rate	Low temperature	Lower sideband [mV]				not
fc/128	Low temperature	Upper sideband [mV]				selected

2008-05-21 Page 16 of 22

Test report no.: 1-0510-01-01/08

2.5.5 Operating Field strength (Type A and B)

2.5.5.1 Test Case 6.2 (BSI TR-03105; ePassport Conformity Testing, part2) Operating Field strength

Not selected

2.5.5.2 Test Case 4.2 (ICAO RF protocol and application test standards for e-Passport – part 2) Operating Field strength

The purpose of this test is to check the required performance between 1,5 A/m and 7,5 A/m. The ePassport shall operate as intended over the full range.

This test has to be performed for samples of both types (A and B) but the concrete test procedures differ (see ICAO RF protocol and application test standards for e-Passport – part 2, Section 4.2, for details).

Method of measurement and test environment see conditions of ISO / IEC 14443-2. The inlay shall operate as intended within 1.5 A/m and 7.5 A/m.

Test Conditions:

Parameters	Date of test	Number of Samples	Passed tests	Failed tests
Field strength 1.5 A/m 7.5 A/m Temperature RT, -10 °C, 50 °C	2008-05-21	1	1 * 3	0

Test report no.: 1-0510-01-01/08

2.5.6 Communication Stability (Type A and B)

2.5.6.1 Test Case 6.3 (BSI TR-03105; ePassport Conformity Testing, part2) Communication Stability

Not selected

2.5.6.2 Test Case 4.3 (ICAO RF protocol and application test standards for e-Passport – part 2) Communication stability test

The purpose of this test is to determine the communication stability versus field strength and rise and fall time. Method of measurement and test environment see conditions of ISO / IEC 14443-2. The inlay shall operate as intended within 1.5 A/m and 7.5 A/m.

This test has to be performed for samples of both types (A and B) but the concrete test procedures differ (see ICAO RF protocol and application test standards for e-Passport – part 2, Section 4.3, for details).

Test Conditions:

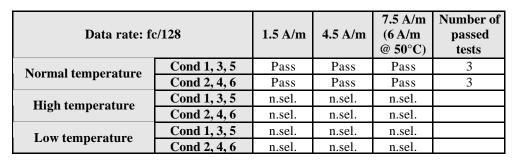

Parameters	Date of test	Number of Samples	Passed tests	Failed tests
Field strength 1.5 A/m, 4.5 A/m, 7.5 A/m Temperature RT, -10 °C, 50 °C	2008-05-21	1	1 * 18	0

Test report no.: 1-0510-01-01/08

Test results:

Sample 1:

CETECOM

Data rate: fc/64		1.5 A/m	4.5 A/m	7.5 A/m (6 A/m @ 50°C)	Number of passed tests
Normal temperature	Cond 1, 3, 5	Pass	Pass	Pass	3
	Cond 2, 4, 6	Pass	Pass	Pass	3
High temperature	Cond 1, 3, 5	n.sel.	n.sel.	n.sel.	
ingii temperature	Cond 2, 4, 6	n.sel.	n.sel.	n.sel.	
I am tampanatura	Cond 1, 3, 5	n.sel.	n.sel.	n.sel.	
Low temperature	Cond 2, 4, 6	n.sel.	n.sel.	n.sel.	

Data rate: fc/32		1.5 A/m	4.5 A/m	7.5 A/m (6 A/m @ 50°C)	Number of passed tests
Normal temperature	Cond 1, 3, 5	Pass	Pass	Pass	3
Normal temperature	Cond 2, 4, 6	Pass	Pass	Pass	3
High temperature	Cond 1, 3, 5	n.sel.	n.sel.	n.sel.	
Iligii temperature	Cond 2, 4, 6	n.sel.	n.sel.	n.sel.	
Low temperature	Cond 1, 3, 5	n.sel.	n.sel.	n.sel.	
Low temperature	Cond 2, 4, 6	n.sel.	n.sel.	n.sel.	

Data rate: fc/16		1.5 A/m	4.5 A/m	7.5 A/m (6 A/m @ 50°C)	Number of passed tests
Normal temperature	Cond 1, 3, 5	n.a.	n.a.	n.a.	
Normal temperature	Cond 2, 4, 6	n.a.	n.a.	n.a.	
High temperature	Cond 1, 3, 5	n.a.	n.a.	n.a.	
ingii temperature	Cond 2, 4, 6	n.a.	n.a.	n.a.	
I am tampanatura	Cond 1, 3, 5	n.a.	n.a.	n.a.	
Low temperature	Cond 2, 4, 6	n.a.	n.a.	n.a.	

Note: The DUT does not support fc/16.
