## Verklaringen, voorbehouden en bezwaren

Denemarken, 18 mei 2002

... However, that the Protocol will not apply to the Faroe Islands and Greenland.

Verenigde Staten van Amerika, de, 8 oktober 2008

The United States of America understands that the Protocol of 1997 does not, as a matter of international law, prohibit Parties from imposing, as a condition of entry into their ports or internal waters, more stringent emission standards or fuel oil requirements than those identified in the Protocol.

The United States of America understands that Regulation 15 applies only to safety aspects associated with the operation of vapour emission control systems that may be applied during cargo transfer operations between a tanker and port-side facilities and to the requirements specified in Regulation 15 for notification to the International Maritime Organization of port State regulation of such systems.

The United States of America notes that at the time of adoption of the Protocol of 1997, the NO<sub>x</sub> emission control limits contained in Regulation 13 were those agreed as being achievable by January 1 2000, on new marine diesel engines, and further notes that Regulation 13(3)(b) contemplated that new technology would become available to reduce on-board NO<sub>x</sub> emissions below those limits. As such improved technology is now available, the United States expresses its support for an amendment to Annex VI that would, on an urgent basis, revise the agreed NO<sub>x</sub> emission control limits contained in Regulation 13 in keeping with new technological developments.
